How to submit an article for *Reflections*

Each year there are four issues of *Reflections*. The first issue is dedicated to papers from the previous annual conference. We invite authors to submit papers for publication in the other three issues. Copy should be sent to the editor, Michael Cavanagh, via email michael.cavanagh@mq.edu.au by 31 January, 30 April and 31 July so that members of the editorial panel can read and evaluate the material before printing in the subsequent issue.

Authors should submit their work as a Word document if possible. Clear, black diagrams and tables need to be labelled and referred to in the paper.

All references must be given. References to a journal paper or monograph should follow this format:

Kissane, B., Bradley, J. & Kemp, M. (1994). Graphics calculators, equity and assessment. *Australian Senior Mathematics Journal*, 8(2), 31-43.

Heid, M. K. (1995). Algebra in a Technological World. National Council of Teachers of Mathematics: Reston, Virginia.

We particularly encourage teachers to write about successful classroom experiences. Areas of interest include:

- the use of technology;
- alternative assessment strategies;
- teaching strategies;
- approaches to a new syllabus;
- ideas for gifted and talented students;
- thematic approaches;
- mathematical ideas;
- ideas to encourage reluctant learners; and
- alternative ways to present senior topic areas.

Teachers often produce and regularly use excellent worksheets. In each issue we would like to reproduce some of these in the Maths Exchange section. Worksheets must be original as we cannot reprint material without consulting and acknowledging the initial publisher. Please send a copy of your favourite worksheet to Robert Yen, Ambarvale High School, PO Box 90, Campbelltown, 2560.

We are also interested in receiving material for the Classroom Corner. These articles should concern ideas about practical ways that teachers can improve the quality of their classroom instruction. Please send your contributions to Cyril Quinlan via email c.quinlan@mary.acu.edu.au.
