

## Numeracy Stage 6 Syllabus

### Who should do this course?

This course is designed for teachers planning to or currently teaching the Stage 6 Numeracy CEC for the first time or those looking for new ways to approach this course and its clientele.

### What will happen on the course?

Participants will:

- Reflect upon the unique student body that engage with the Numeracy CEC Stage 6 course as well as the specialised features of this syllabus
- Explore the content and was to organise and teach it effectively to Numeracy students, focusing on the gradual development of NRMT
- Develop outlines for units of work designed around student's interest where opportunities for learning the concepts and skills of the syllabus arise naturally
- Consider implications for assessment, NESA requirements and best practice approaches.

### Why should I take this course?

Take this course to be able to confidently design a teaching and learning program for the Numeracy CEC Stage 6 course based on the interests and needs of your students. Leave this course with ideas and resources to support units of learning that can be used with most students, designed around general interests such as getting a job and gaming.
